

1.2.5 Likely significant aspects/impacts

Document Control

Title:	Likely significant environmental aspects & impacts	Document Number:	1.2.5
Issue / Revision status:	Issue 1: Approved		
Author:	Guy Beards	Date	10/7/09
Approval:	Sustainable Development Management Champions	Date:	10 th July 2009

Aspects

- Animal care – ethical issues
- Liquid waste disposal
- Disposal of recyclable materials
- Electricity consumption (including lighting and ICT)
- Food purchase and disposal
- Hazardous waste production and disposal
- Use of heating fuel – gas, oil and LPG
- Agricultural inputs (livestock food, fertilisers etc)
- Purchase and disposal of office consumables (paper, toner etc)
- Fleet management
- Water consumption (direct and indirect)
- Carpentry materials purchase and disposal
- Disposal of liquid and solid wastes from vehicle workshops
- Lead in plumbing workshops purchase, use and disposal
- Travel (non-fleet), including commuting
- ICT purchase, use and disposal
- Non-hazardous waste disposal
- Farm waste disposal
- Sewage treatment
- Emissions to air (boilers, welding, plumbing, nails etc)
- Nuisance issues
- Leaks
- Previous use of sites may have left contamination
- Silk screen reclamation
- Building fire
- Peat use

Impacts

- Animal suffering
- Damage to sewage treatment system
- Pollution of groundwater and surface waters
- Unnecessary use of raw materials
- Global warming
- Air pollution (acid precipitation, noxious pollutants etc)
- Ozone depletion
- Nuisance
- Vermin
-
- Pollution at waste disposal site; risk to waste handlers
- Flooding
- Water stress (in supplier countries and UK)
- Contaminated land
- Air pollution from vehicles
- Nuisance from car parking
- Asbestos release
- Biodiversity and public amenity damage
