

1.6.2 Staff Development

Our Environment, sustainable development, and Wiltshire College

This Staff Development session will be delivered in three parts.

Part 1 (1:30 – 2:30)

This session will give you an understanding of some of the major environmental issues facing organisations today. Some of the questions that will be addressed include:

- How does turning down the thermostat reduce the risk of climatic disasters?
 - o (and have the scientists made up their minds yet?)
- What air pollutants should we be concerned about?
- Is water pollution still a problem in this day and age?
- Where does our waste go?

Part 2 (2:30 – 3:30)

An introduction to the College Environmental Management System, providing an overview and developing ways in which staff can become involved.

Part 3 (3:30 – 4:30)

A workshop where views will be sought that will influence the policies developed by the College, and for you to make suggestions for improvements. We will cover:

- How is the College co-ordinating its various 'green' activities?
- How should we prioritise the myriad sustainability issues?
- What improvements can we make, and how can we improve communications on these issues? and
- How can I get involved?
